ELSEVIER

Thin Solid Films 332 (1998) vii–xi

thin solid films

# Contents

Publication schedule . . . . . v
Preface . . . . . xiii
Committees . . . . . xiv
Exhibitors . . . . . xvii

**Optical thin films**

*Recent advances in optical coating materials*

Implementation of micromirror arrays as optical binary switches and amplitude modulators*
E.S. Kolesar, P.B. Allen, J.W. Wilken, J.T. Howard . . . . . 1

Laser induced chemical vapor deposition of optical thin films on curved surfaces
S. Tamir, S. Berger, K. Rabinovitch, M. Gilo, R. Dahan . . . . . 10

*Ellipsometry, plasma diagnostics and optical methods for process monitoring and control*

Process monitoring and control of low temperature reactively sputtered AlN
S.R. Kirkpatrick, S.L. Rohde, D.M. Mihut, M.L. Kurruppu, J.R. Swanson III, D. Thomson, J.A. Woollam. . . . 16

Deposition of tungsten thin films by dual frequency inductively coupled plasma assisted CVD
P. Colpo, F. Rossi, N. Gibson, D. Gilliland . . . . . 21

Ellipsometry and transport studies of thin-film metal nitrides
J. Humlíček, A. Nebojsa, J. Hora, M. Stráský, J. Spousta, T. Šikola . . . . . 25

*Structure/property relationships in dielectric films*

Correlation of predicted and observed optical properties of multilayer thermal control coatings*
D.A. Jaworske . . . . . 30

*Optical thin films (poster session)*

Highly transparent nano-crystalline diamond films via substrate pretreatment and methane fraction optimization
K.H. Chen, D.M. Bhusari, J.R. Yang, S.T. Lin, T.Y. Wang, L.C. Chen . . . . . 34

Thick $SiO_xN_y$ and $SiO_2$ films obtained by PECVD technique at low temperatures
M.I. Alayo, I. Pereyra, M.N.P. Carreño. . . . . 40

Optical properties of RF sputtered strontium substituted barium titanate thin films
B. Panda, A. Dhar, G.D. Nigam, D. Bhattacharya, S.K. Ray . . . . . 46

Extremely fast ellipsometry solutions using cascaded neural networks alone
F.K. Urban III, D. Barton, N.I. Boudani. . . . . 50

**Diamond and related materials**

*Synthesis, characterization and applications of cubic boron nitride and CN materials*

Properties of carbon nitride films deposited by magnetron sputtering
Y. Kusano, J.E. Evetts, R.E. Somekh, I.M. Hutchings . . . . . 56

Vibrational properties of carbon nitride films by Raman spectroscopy
A.K.M.S. Chowdhury, D.C. Cameron, M.S.J. Hashmi . . . . . 62

Preparation of $CN_x$-phases using plasma-assisted and hot filament chemical vapour deposition
A. Leonhardt, H. Grüger, D. Selbmann, B. Arnold, J. Thomas . . . . . 69

*Invited paper.

Sputtering process of carbon nitride films by using a novel bio-molecular C–N containing target
T.R. Lu, L.C. Chen, K.H. Chen, D.M. Bhusari, T.M. Chen, C.T. Kuo . . . . . 74

Structures and properties of disordered boron carbide coatings generated by magnetron sputtering
T. Hu, L. Steihl, W. Rafaniello, T. Fawcett, D.D. Hawn, J.G. Mashall, S.J. Rozeveld, C.L. Putzig, J.H. Blackson, W. Cermignani, M.G. Robinson . . . . . 80

*Synthesis and characterization of diamond and related materials*

A technique for large area deposition of diamond via combustion flame synthesis
R.T. Rozbicki, V.K. Sarin . . . . . 87

Microwave plasma chemical vapor deposition of diamond films with low residual stress on large area porous silicon substrates
M.A. Khan, M.S. Haque, H.A. Naseem, W.D. Brown, A.P. Malshe . . . . . 93

DC electrical conductivity of chemical vapour deposited diamond sheets: a correlation with hydrogen content and paramagnetic defects
A.K. Sikder, A.P. Jacob, T. Sharda, D.S. Misra, M. Pandey, D. Kabiraj, D.K. Avasthi . . . . . 98

The investigation of thermal effect on the properties of pulsed laser deposited diamond-like carbon films
H.-S. Jung, H.-H. Park, S.S. Pang, S.Y. Lee . . . . . 103

Thermal diffusion in molecular dynamics simulations of thin film diamond deposition
B.A. Pailthorpe, D. Mitchell, N.S. Bordes . . . . . 109

On the hardness of a-C:H films prepared by methane plasma decomposition
F.C. Marques, R.G. Lacerda, G.Y. Odo, C.M. Lepienski . . . . . 113

*Electronic and optical applications of diamond and related materials*

The microstructural dependence of the opto-electronic properties of nitrogenated hydrogenated amorphous carbon thin films
S.R.P. Silva, R.U.A. Khan, A.P. Burden, J.V. Anguita, J.M. Shannon, B.J. Sealy, A.J. Papworth, C.J. Kiely, G.A.J. Amaratunga . . . . . 118

*Properties and applications of diamond, diamond like and CBN coatings*

Influence of water vapour and oxygen on the tribological behaviour of diamond coatings/steel couple
M. Schmitt, D. Paulmier, T. Le Huu, M. El Mansori, A. Grabchenko, A.G. Mamalis . . . . . 124

*Diamond and related materials (poster session)*

Structural modifications and temperature stability of silicon incorporated diamond-like a-C:H films
S.S. Camargo Jr., R.A. Santos, A.L. Baia Neto, R. Carius, F. Finger. . . . . 130

Diamond deposition from methanol–hydrogen–water mixed gas using a low pressure, radio frequency, inductively-coupled plasma
M. Hiramatsu, H. Noda, H. Nagai, M. Shimakura, M. Nawata . . . . . 136

Gas desorption and adsorption properties of carbon based material used for cathode ray tube
M. Hashiba, T. Hino, Y. Hirohata, H. Shinbori, S. Deyama, H. Chiyoda . . . . . 141

**Tribological coatings/surface modifications**

*Mechanical characterization – micromechanical testing and modelling*

Influence of stress distribution on adhesion strength of sputtered hard coatings
H.K. Tönshoff, B. Karpuschewski, A. Mohlfeld, H. Seegers. . . . . 146

The nano-scratch tester (NST) as a new tool for assessing the strength of ultrathin hard coatings and the mar resistance of polymer films
R. Consiglio, N.X. Randall, B. Bellaton, J. von Stebut . . . . . 151

A laser-acoustic method for testing and classifying hard surface layers
D. Schneider, B. Schultrich, H.-J. Scheibe, H. Ziegele, M. Griepentrog. . . . . 157

Mechanical properties of $SiO_2$ and $Si_34$ coatings: a BAM/NIST co-operative project
U. Beck, D.T. Smith, G. Reiners, S.J. Dapkunas. . . . . 164

**Advanced coatings and thin film characterization**

*Mechanical characterization – mechanical properties and adhesion*

Indentation of graded substrates*
A.E. Giannakopoulos . . . . . 172

Crack formation mechanisms during micro and macro indentation of diamond-like carbon coatings on elastic–plastic substrates
N.B. Thomsen, A.C. Fischer-Cripps, M.V. Swain . . . 180

Strength of HVOF coating–substrate interfaces
C.M. Nygårds, K.W. White, K. Ravi-Chandar . . . 185

Measurement of the micro mechanical properties of sol-gel $TiO_2$ films
Å.K. Jämting, J.M. Bell, M.V. Swain, L.S. Wielunski, R. Clissold . . . 189

Mechanical properties of W and W(C) thin films: Young's modulus, fracture toughness and adhesion
E. Harry, A. Rouzaud, M. Ignat, P. Juliet . . . 195

Comparison of mechanical properties of TiN thin films using nanoindentation and bulge test
O.R. Shojaei, A. Karimi . . . 202

*Non-destructive and in situ characterization*

Electronic structure and chemical characterization of ultrathin insulating films*
J.M. Sanz, L. Soriano, P. Prieto, G. Tyuliev, C. Morant, E. Elizalde . . . 209

*Surface and thin film analysis*

Depth profiling of non-conductive oxidic multilayers with plasma-based SNMS in HF-mode
J. Goschnick, C. Natzeck, M. Sommer, F. Zudock . . . 215

Electrical and microwave characterization of kanthal thin films: temperature and size effect
K.S. Bhat, S.K. Datta, C. Suresh . . . 220

Hexagonal nitride coatings: electronic and mechanical properties of $V_2N$, $Cr_2N$ and $\delta$-MoN
R. Sanjinés, P. Hones, F. Lévy . . . 225

Surface- and microanalytical characterization of silicon-carbonitride thin films prepared by means of radio-frequency magnetron co-sputtering
H. Lutz, M. Bruns, F. Link, H. Baumann . . . 230

Corrosion of titanium-nitride encapsulated silver films exposed to a $H_2S$ ambient
D. Adams, B.A. Julies, J.W. Mayer, T.L. Alford . . . 235

Sputter deposited chromium nitride based ternary compounds for hard coatings
P. Hones, R. Sanjinés, F. Lévy . . . 240

Effect of external magnetic field on *c*-axis orientation and residual stress in AlN films
K. Kusaka, T. Ao, T. Hanabusa, K. Tominaga . . . 247

*Mictostructural characterization – microanalytical and imaging characterization*

Microstructural characterisation of carbonaceous dust generated during the deposition of diamond-like carbon coatings
A.P. Burden, J.V. Anguita, S.R.P. Silva . . . 252

Technique for characterization of thin film porosity
D.J. Taylor, P.F. Fleig, S.L. Hietala . . . 257

Secondary electron imaging of nucleation and growth of semiconductors for nanostructure fabrication
Y. Homma . . . 262

Structural and electrochromic properties of InN thin films
N. Asai, Y. Inoue, H. Sugimura, O. Takai . . . 267

*Advance coatings and thin film characterization (poster session)*

Characterizing and modeling the apparent anomalous behavior of resistivity in Cr–Si–O thin films
A.F. Jankowski . . . 272

Structural studies of ITO thin films with the Rietveld method
M. Quaas, C. Eggs, H. Wulff . . . 277

On the energy influx to the substrate during sputter deposition of thin aluminium films
H. Kersten, G.M.W. Kroesen, R. Hippler . . . 282

Raman microscopy study of pulsed laser ablation deposited silicon carbide films
F. Neri, S. Trusso, C. Vasi, F. Barreca, P. Valisa . . . 290

Study on chromium oxide synthesized by unbalanced magnetron sputtering
D.-Y. Wang, J.-H. Lin, W.-Y. Ho . . . 295

Effect of excess Pb and O content on the ferroelectric properties of sputter deposited $Pb(Zr_{0.52}Ti_{0.48})O_3Pt$ system
H.-H. Park, I.-S. Jin, D.-H. Kim, T. Song Kim . . . 300

A study on the structural distribution of Se-passivated GaAs surface
J.-W. Kim, S.-H. Sa, M.-G. Kang, H.-H. Park . . . . . 305

**Advance materials in microelectrics**

*Advanced metalization: materials and processes*

Texture and surface roughness of PRCVD aluminum films
D. Yang, R. Jonnalagadda, B.R. Rogers, J.T. Hillman, R.F. Foster, T.S. Cale. . . . . 312

A low temperature integrated aluminum metallization technology for ULSI devices
T. Guo, L.Y. Chen, D. Brown, P. Besser, S. Voss, R. Mosely. . . . . 319

Evaluation of tantalum silicide sputtering target materials for amorphous Ta–Si–N diffusion barrier for Cu metallization
E. Ivanov. . . . . 325

Characterization of a PECVD $W_xN$ process using $N_2$, $H_2$, and $WF_6$
K.K. Lai, A.W. Mak, T.P.H.F. Wendling, P. Jian, B. Hathcock . . . . . 329

TiN reactive sputter deposition studied as a function of the pumping speed
W.M. Heuvelman, P. Helderman, G.C.A.M. Janssen, S. Radelaa . . . . . 335

Synthesis and processing of a Cu-In-Ga-Se sputtering target
C. Suryanarayana, E. Ivanov, R. Noufi, M.A. Contreras, J.J. Moore. . . . . 340

*Advance dielectrics and planarization: materials and processes*

The effects of plasma treatment for low dielectric constant hydrogen silsesquioxane (HSQ)
P.T. Liu, T.C. Chang, S.M. Sze, F.M. Pan, Y.J. Mei, W.F. Wu, M.S. Tsai, B.T. Dai, C.Y. Chang, F.Y. Shih, H.D. Huang . . . . . 345

Enhancing the thermal stability of low dielectric constant hydrogen silsesquioxane by ion implantation
T.C. Chang, M.F. Chou, Y.J. Mei, J.S. Tsang, F.M. Pan, W.F. Wu, M.S. Tsai, C.Y. Chang, F.Y. Shih, H.D. Huang 351

Uncooled thin film infrared imaging device with aerogel thermal isolation: deposition and planarization techniques
J.A. Ruffner, P.G. Clem, B.A. Tuttle, C.J. Brinker, C.S. Sriram, J.A. Bullington . . . . . 356

Precursor selection for plasma deposited fluorinated amorphous carbon films*
T.W. Mountsier, J.A. Samuels . . . . . 362

Properties of low dielectric constant fluorinated silicon oxide films prepared by plasma enhanced chemical vapor deposition
K. Kim, D. Kwon, G.S. Lee. . . . . 369

MOS capacitor characteristics of plasma oxide on partially strained SiGeC films
S.K. Ray, L.K. Bera, C.K. Maiti, S. John, S.K. Banerjee . . . . . 375

*Chemical mechanical polishing*

Assessment of post-CMP cleaning mechanisms using statistically-designed experiments
G. Zhang, G. Burdick, F. Dai, T. Bibby, S. Beaudoin . . . . . 379

A modified multi-chemical spray cleaning process for post shallow trench isolation chemical mechanical polishing cleaning application
Y.L. Wang, T.C. Wang, J. Wu, W.T. Tseng, T.E. Hsieh . . . . . 385

Chemical–mechanical polishing for giant magnetoresistance device integration
Y.Z. Hu, R.J. Gutmann, T.P. Chow, B. Witcraft. . . . . 391

Material characteristics and chemical–mechanical polishing of aluminum alloy thin films
Y.L. Wang, J. Wu, C.W. Liu, T.C. Wang, J. Dun, F.K. Yang . . . . . 397

*Silicides*

Advanced salicides for 0.10 μm CMOS: Co salicide processes with low diode leakage and Ti salicide processes with direct formation of low resistivity C54 $TiSi_2$*
J.A. Kittl, Q.Z. Hong, H. Yang, N. Yu, S.B. Samavedam, M.A. Gribelyuk. . . . . 404

Selective deposition of $TiSi_2$ on ultra-thin silicon-on-insulator (SOI) wafers
J.-s. Maa, B. Ulrich, S. Teng Hsu, G. Stecker. . . . . 412

The effects of the process parameters on the electrical and microstructure characteristics of the CrSi thin resistor films: part I
F. Wu, A.W. McLaurin, K.E. Henson, D.G. Managhan, S.L. Thomasson . . . . . 418

*Silicon contact technology*

Characterization of multilayered Ti/TiN films grown by chemical vapor deposition
J.C. Hu, T.C. Chang, L.J. Chen, Y.L. Yang, C.Y. Chang . . . . . 423

Low parasitic resistance contacts for scaled ULSI devices*
C.M. Osburn, K.R. Bellur . . . . . 428

*Advanced materials in microelectronics (poster session)*

Effect of GaAs surface treatments using HCl or $(NH_4)_2S_x$ solutions on the interfacial bonding states induced by deposition of Au
M.-G. Kang, H.-H. Park . . . . . 437

Effect of $O_2$ plasma treatment on the properties of $SiO_2$ aerogel film
H.-R. Kim, H.-H. Park, S.-H. Hyun, G.-Y. Yeom . . . . . 444

The effect of sol viscosity on the sol–gel derived low density $SiO_2$ xerogel film for intermetal dielectric application
J.-K. Hong, H.-R. Kim, H.-H. Park . . . . . 449

Author Index of volume 332 . . . . . 455

Subject Index of Volume 332. . . . . 457
